

NUDURA Project Profile

Norton Pediatric Center - Louisville, Kentucky

FAST FACTS

- Norton Pediatric is a pediatric outpatient center built to hospital standards. The 70,040 square foot facility built with NUDURA Insulated Concrete Forms includes a 24-hour emergency department, diagnostic imaging including MRI, CT and Ultrasound. The surgery department and central sterile supports four operating rooms and two future planned operating room additions.
- This facility will be LEED® Certified and is designed to meet ENERGY STAR requirements.
