

NUDURA Project Profile

Seacoast Geriatrics II - Dover, New Hampshire

FAST FACTS

- Approximately 30,000 sq ft.
- 100% of main structure (excluding exterior connector) are made with NUDURA[®] Insulated Concrete Forms.
- Additional NUDURA[®] Insulated Concrete Forms were used for interior firewalls for each wing of the building.
- Combination exterior finish: vinyl siding, vinyl shakes, cultured stone with a wood truss roof structure.
- Solar panels were installed for domestic hot water, occupancy sensors, and to power attic exhaust ventilators.
- Contractor was impressed with the minimal heating costs associated with a winter build and the ability to greatly decrease the mechanical systems required to complete this project.
