## FOAM GUN CLEANER

### PRODUCT INFORMATION SHEET

#### Product Code

NUS-AFOCL-00

#### Product Description

Nudura's Foam Gun Cleaner is designed to quickly and easily clean wet spray foam from hands, tools, and spray foam applicator guns. Available in a 12 oz. (340 g) can, this foam gun cleaner is equipped with an adaptor allowing the product to be sprayed directly from the can. The foam gun cleaner is also designed to thread directly onto the spray foam applicator gun basket to flush the barrel of the applicator gun. Nudura's Foam Gun Cleaner is environmentally friendly, containing no VOC's.

#### Basic Uses

Nudura's Foam Gun Cleaner is used to clean the internal and exterior barrel of the spray foam applicator gun. It can also be used to clean wet spray foam from hands and tools.

#### Application

To use the product directly from the can, begin by installing the adaptor into the valve opening in the top of the can. The adaptor is conveniently connected around the collar of each foam gun cleaner can. Press on the side of the adaptor to apply the product to the outside of the barrel of the foam gun applicator or apply to a cloth for cleaning hands and tools. Once complete, wipe the spray foam applicator gun and tool with a clean cloth, and wash hands with soap and water. Remove the adaptor from the top of the can for storage.

The foam gun cleaner can also be used to clean the internal barrel of the spray foam applicator gun by threading the top of the can into the basket of the applicator gun. Once attached, use the trigger on the applicator gun to dispense the foam gun cleaner through the barrel and spray it into an appropriate receptacle. Continue dispensing the Foam Gun Cleaner until there are no signs of spray foam coming out of the gun. Once the foam applicator gun is cleaned, remove the can from the gun for storage.
