

ROOST 1B

Bainbridge Island, Washington

The 12 townhomes of Roost B are spread across four buildings with residential living on the upper two floors and commercial spaces and parking on the main level. With the community's focus on sustainability and net-zero ready construction, Nudura Insulated Concrete Forms were used to reduce the structures' energy consumption and utility costs. The Nudura One Series enabled the exposed concrete finish with the standard forms allowing a variety of other claddings to complement the natural landscape.

2020 ICF Builder Awards Multi-Family 2nd Runner Up
